Thanks Samantha. Below is the form letter we are getting. You've seen the response (Fox, Driver):

Dear Sirs:

Bear Creek is a significant stream in the Lower Clinch watershed. DOE proposes to bury a wide variety of radioactive materials in a landfill on Bear Creek. The exact contents of the hazardous waste have not been disclosed. A revised plan for the proposed landfill should be issued by DOE. EPA can make DOE do that, and require the plan to be made available for public comment.

**I urge the EPA to require the DOE to reopen public comment on this dangerous plan, so communities that live nearby can**

**have a voice in this process. Please have the DOE issue a revised plan for the proposed landfill.**

Thank you for your attention to this significant issue.

Rosemarie suggested that we put something on the EPA ORR webpage about the intent to have public comment on the new information re EMDF – maybe a few sentences from the Driver letter. I think it is a good idea, since there is a letter writing campaign.

Carl and Samantha – can you update the webpage?

Thank you!
